Building Plot in Agios Tychon, Limassol

€550,000 +VAT

 Agios Tychon, Limassol

A building plot of 951 square meters is available for sale in Agios Tychon, offering a generous parcel for development on Cyprus's southern coast.

The plot's size sets it apart from smaller parcels in the area, giving scope for a substantial build within the site's boundaries. Access to the highway network is close at hand, and everyday amenities lie within easy reach, a practical combination for whatever development the plot ultimately supports.

Agios Tychon sits on the coast within the Limassol district, forming part of the built-up coastal strip that runs east from Limassol city. The area's fabric is a mix of low-rise apartment buildings, hotels and residential plots, developed largely from the later twentieth century onward along Cyprus's southern shoreline. Amenities typical of a coastal settlement of this kind - shops, cafes and services - are part of the everyday pattern here. For anyone building on this plot, the setting means joining an established coastal community rather than building in isolation.

Arazo Estates can arrange a viewing of the plot.
